CALCULATING THE AMOUNT OF MOULDINGS
CALCUL DES QUANTITÉS DE MOULURES
CÁLCULO DEL NÚMERO DE MOLDURAS
CÁLCULO DAS QUANTIDADES DE MOLDURAS

For mouldings: measure the perimeter of the room and add 10% to cover waste from cutting the corners.
For chair-rails and baseboards: measure the perimeter of the room less the width of any openings such as doors and windows. In that case, add 5% for waste.

Pour les moulures : mesurez le périmètre de la pièce et ajoutez 10% pour prévoir les chutes lors de la coupe des angles.
Pour les cimaises et les plinthes : mesurez le périmètre de la pièce moins la largeur des ouvertures telles que les portes et les fenêtres. Prévoyez dans ce cas des chutes de 5%.

Para las molduras: mida el perímetro de la habitación y añada un 10% para pérdidas con el corte de ángulos.
Para las cenefas y los zócalos: mida el perímetro de la habitación y reste la anchura de aberturas como las puertas y las ventanas. Prevea en tal caso una pérdida del 5%.

Para as sancas: meça o perímetro da sala e acrescente 10% para prever perdas quando cortar ângulos.
Para os lambris e rodapés: meça o perímetro da sala e subtraia-lhe a largura das aberturas, tais como portas e janelas. Preveja neste caso uma perda de 5%.
